

Utah Clean School Bus Project:

Quotes

December 17, 2008

“Nearly \$2.4 million in state and federal funding is ready to be divided among the 22 school districts who have applied for grants to retrofit 861 old buses into cleaner-burning more efficient vehicles. This will go a long way to improving air quality for the sake of our kids and grandkids.”

~~Bill Sinclair, Acting Director, Utah Department of Environmental Quality

“Not only does the outside air receive the benefit of reduced pollutants, but the air children breathe on the bus will be cleaner as well,”

~~Cheryl Heying, Director, Division of Air Quality

“Thanks to the partnership efforts we’ve been able to secure the funding and begin the process of retrofitting school buses that will result in not only better quality of air outside, but also improve the air inside the bus for the schoolchildren and the bus driver as well.”

~~Cheryl Heying, Director, Division of Air Quality
